centred on storytelling.

Naheel's brief

A product one group would love, even if others might hate it, centred on storytelling.

A palette for a tool that collects color

Where the look came from

A specimen and collection feel: clean, functional and considered

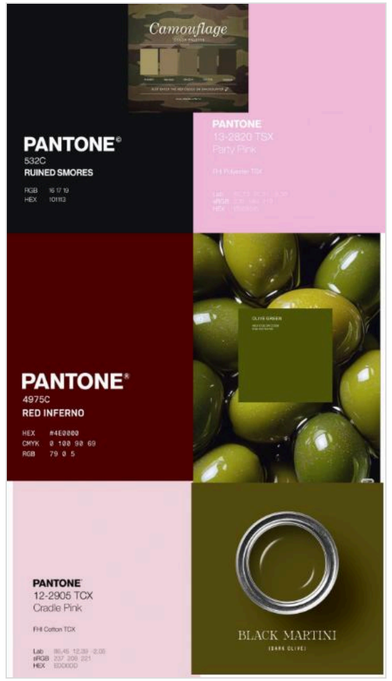

Núria Garcia's business cards

The color is the paper itself

Crocoite, catalogue no. 725.2

One template, many specimens

A Pantone collage

Text set on the color

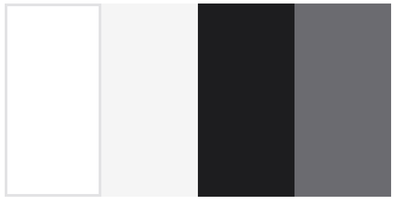

Three of the references on our “palit ideation” moodboards, Are.na and Cosmos, October 2026

The system, condensed

Aa Aa

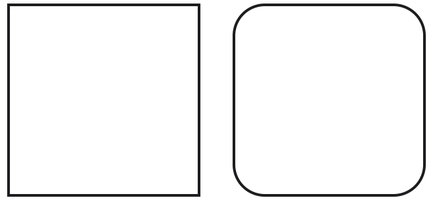

Display Pro and SF Pro, both light

11, 13, 17, 26 and 50pt

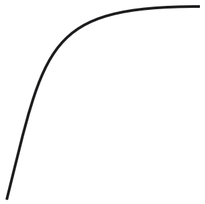

Paper, shell, ink and one gray

The only other color is yours

Square in the heart, round in the shell

One left edge, 20pt in

240ms, one ease

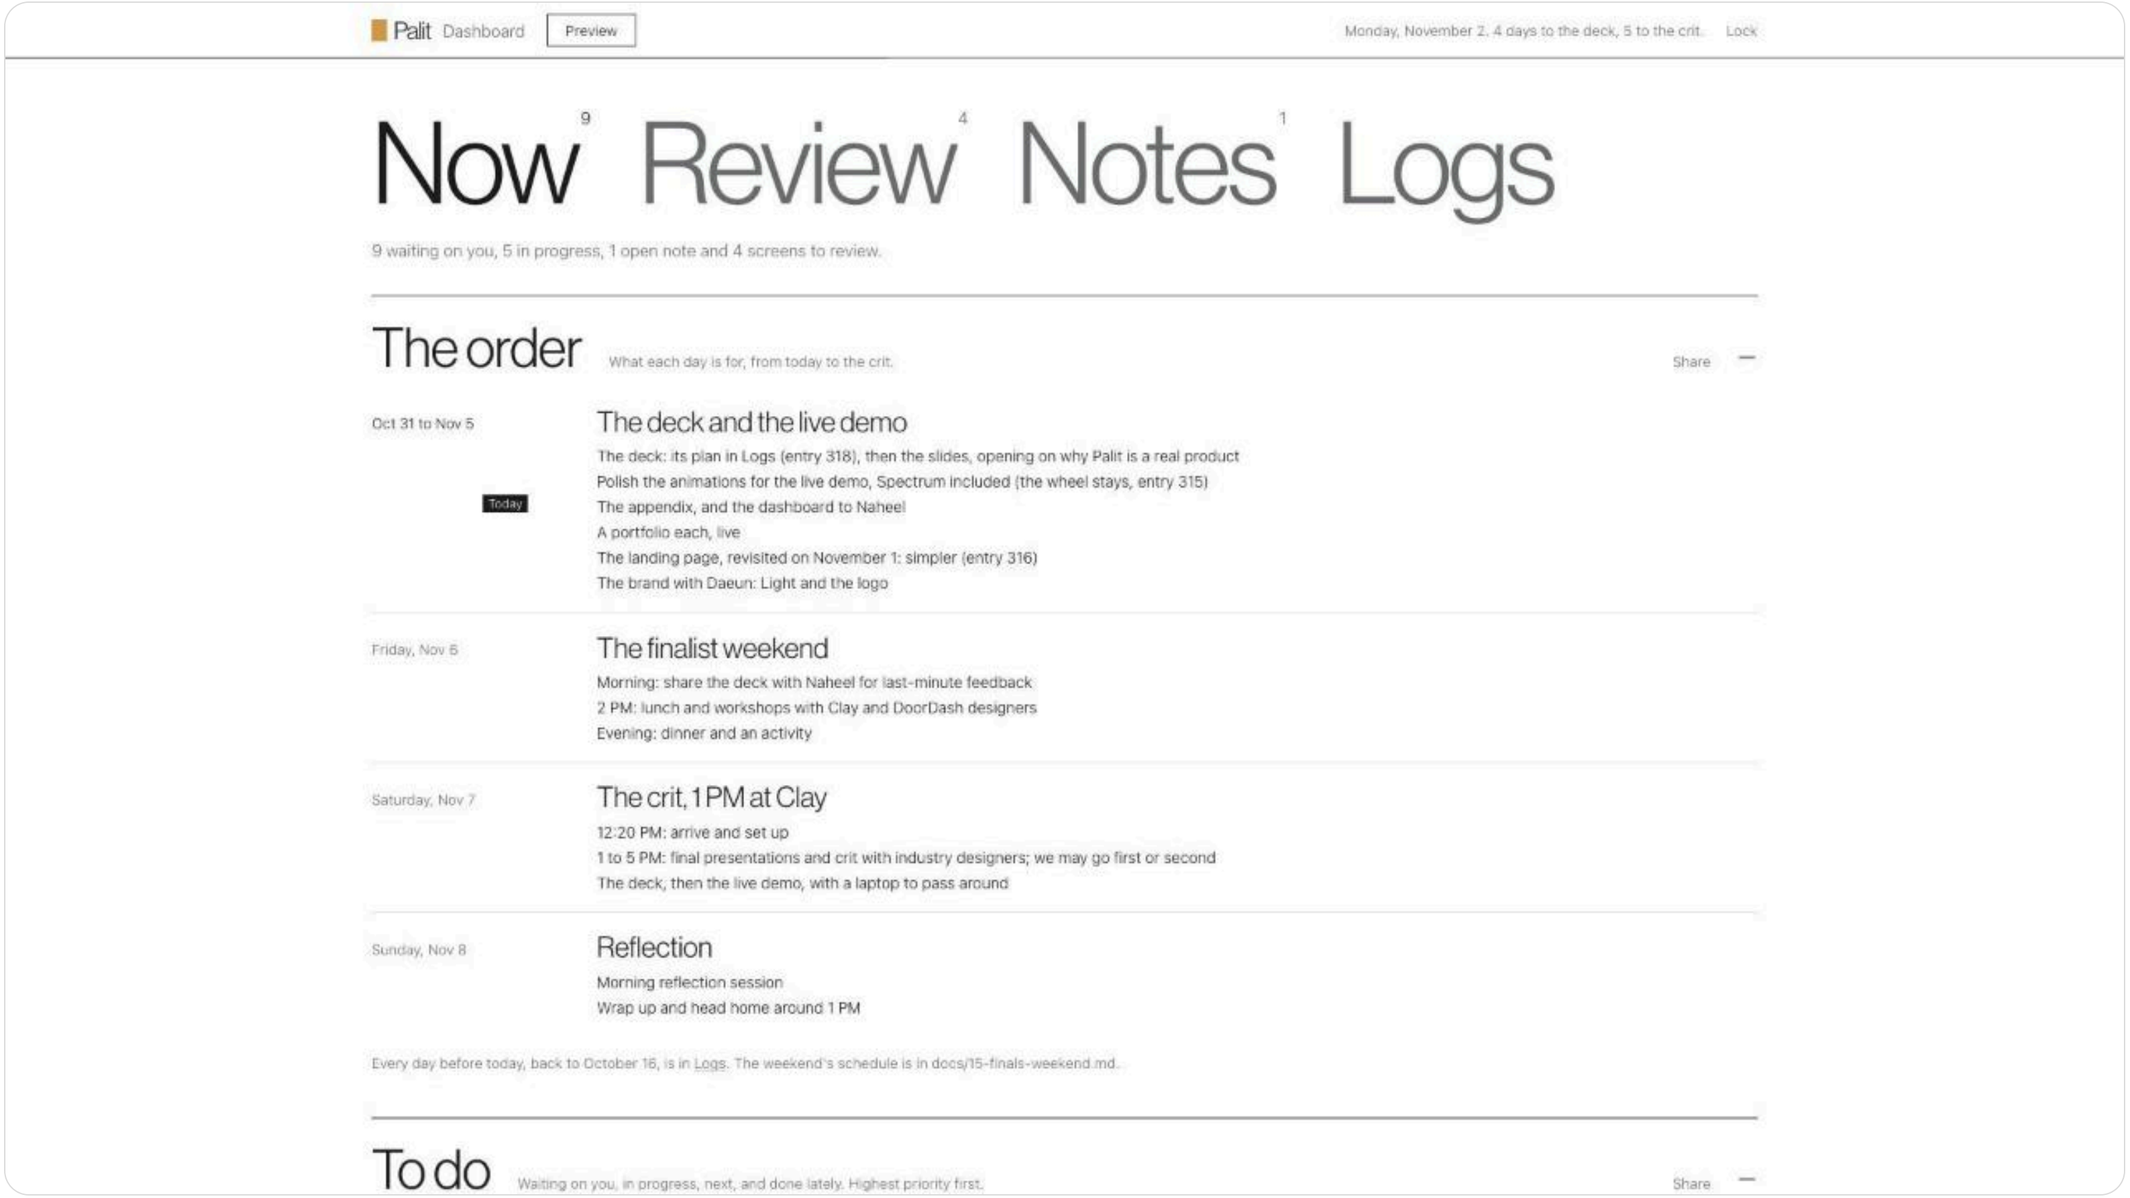

Every open, close and zoom

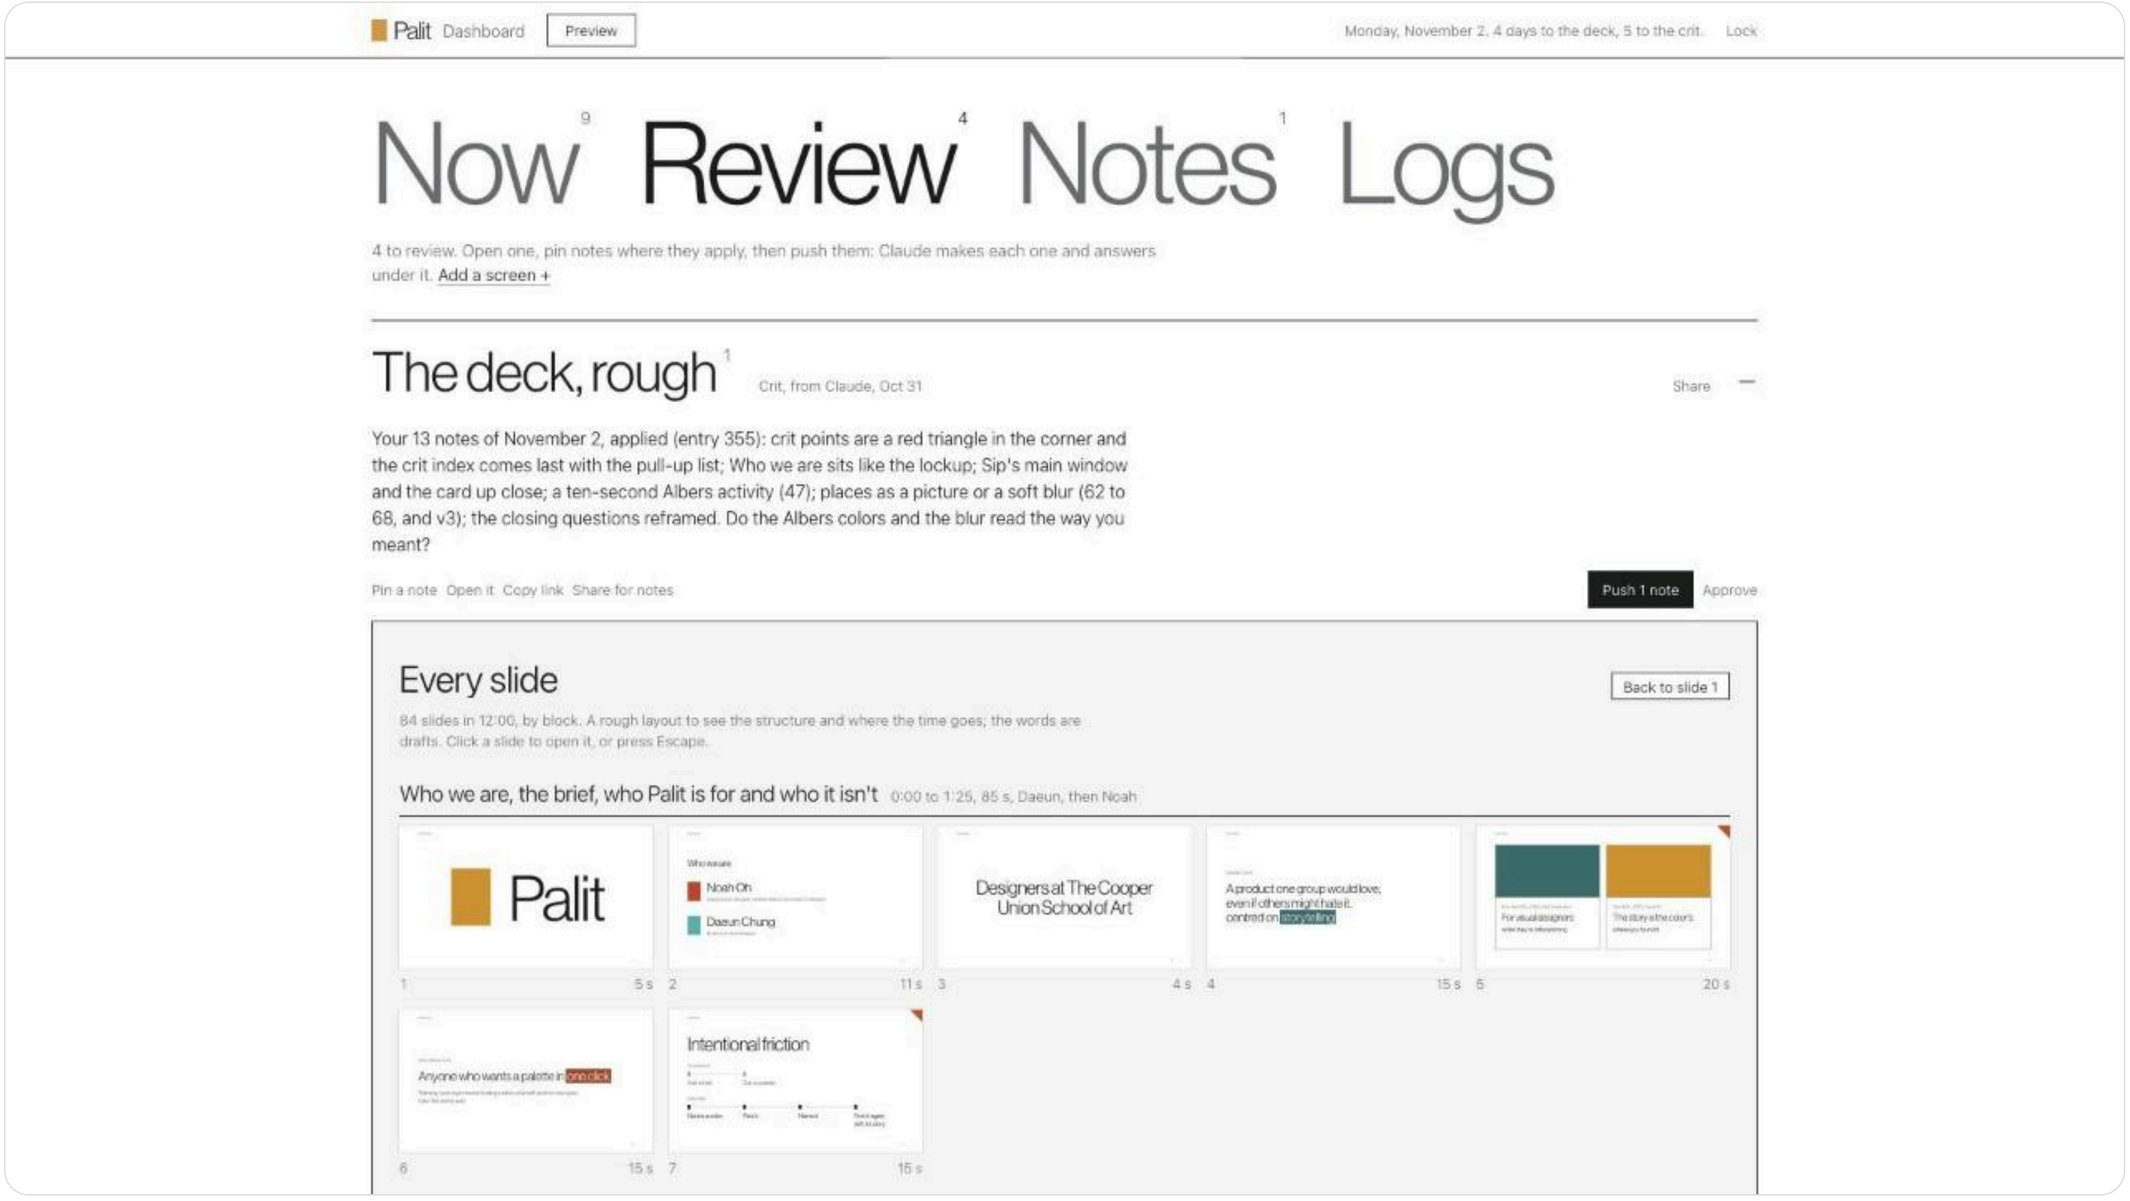

Palit is restraint

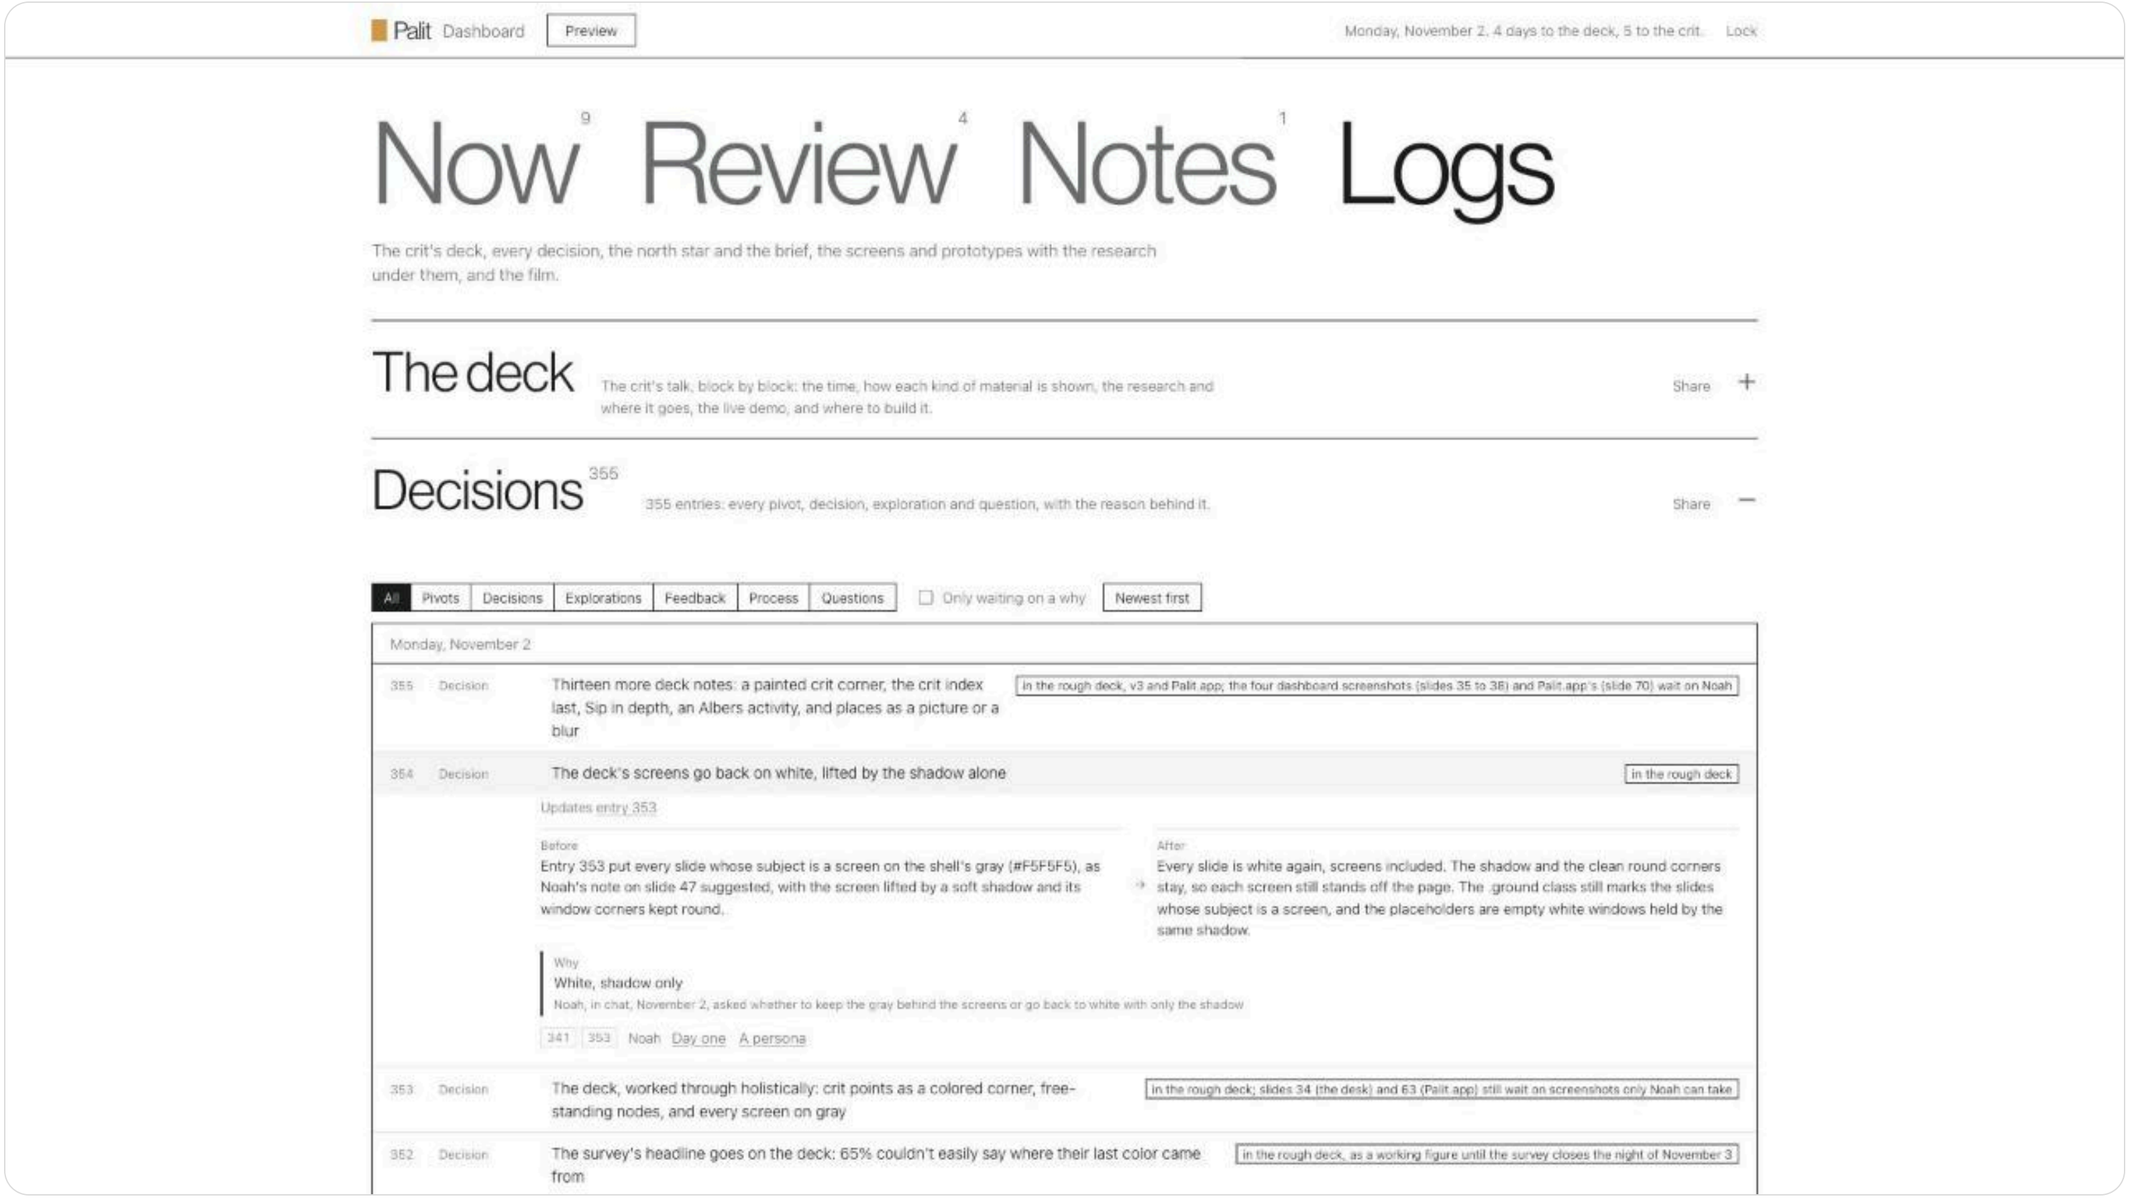

Our workflow

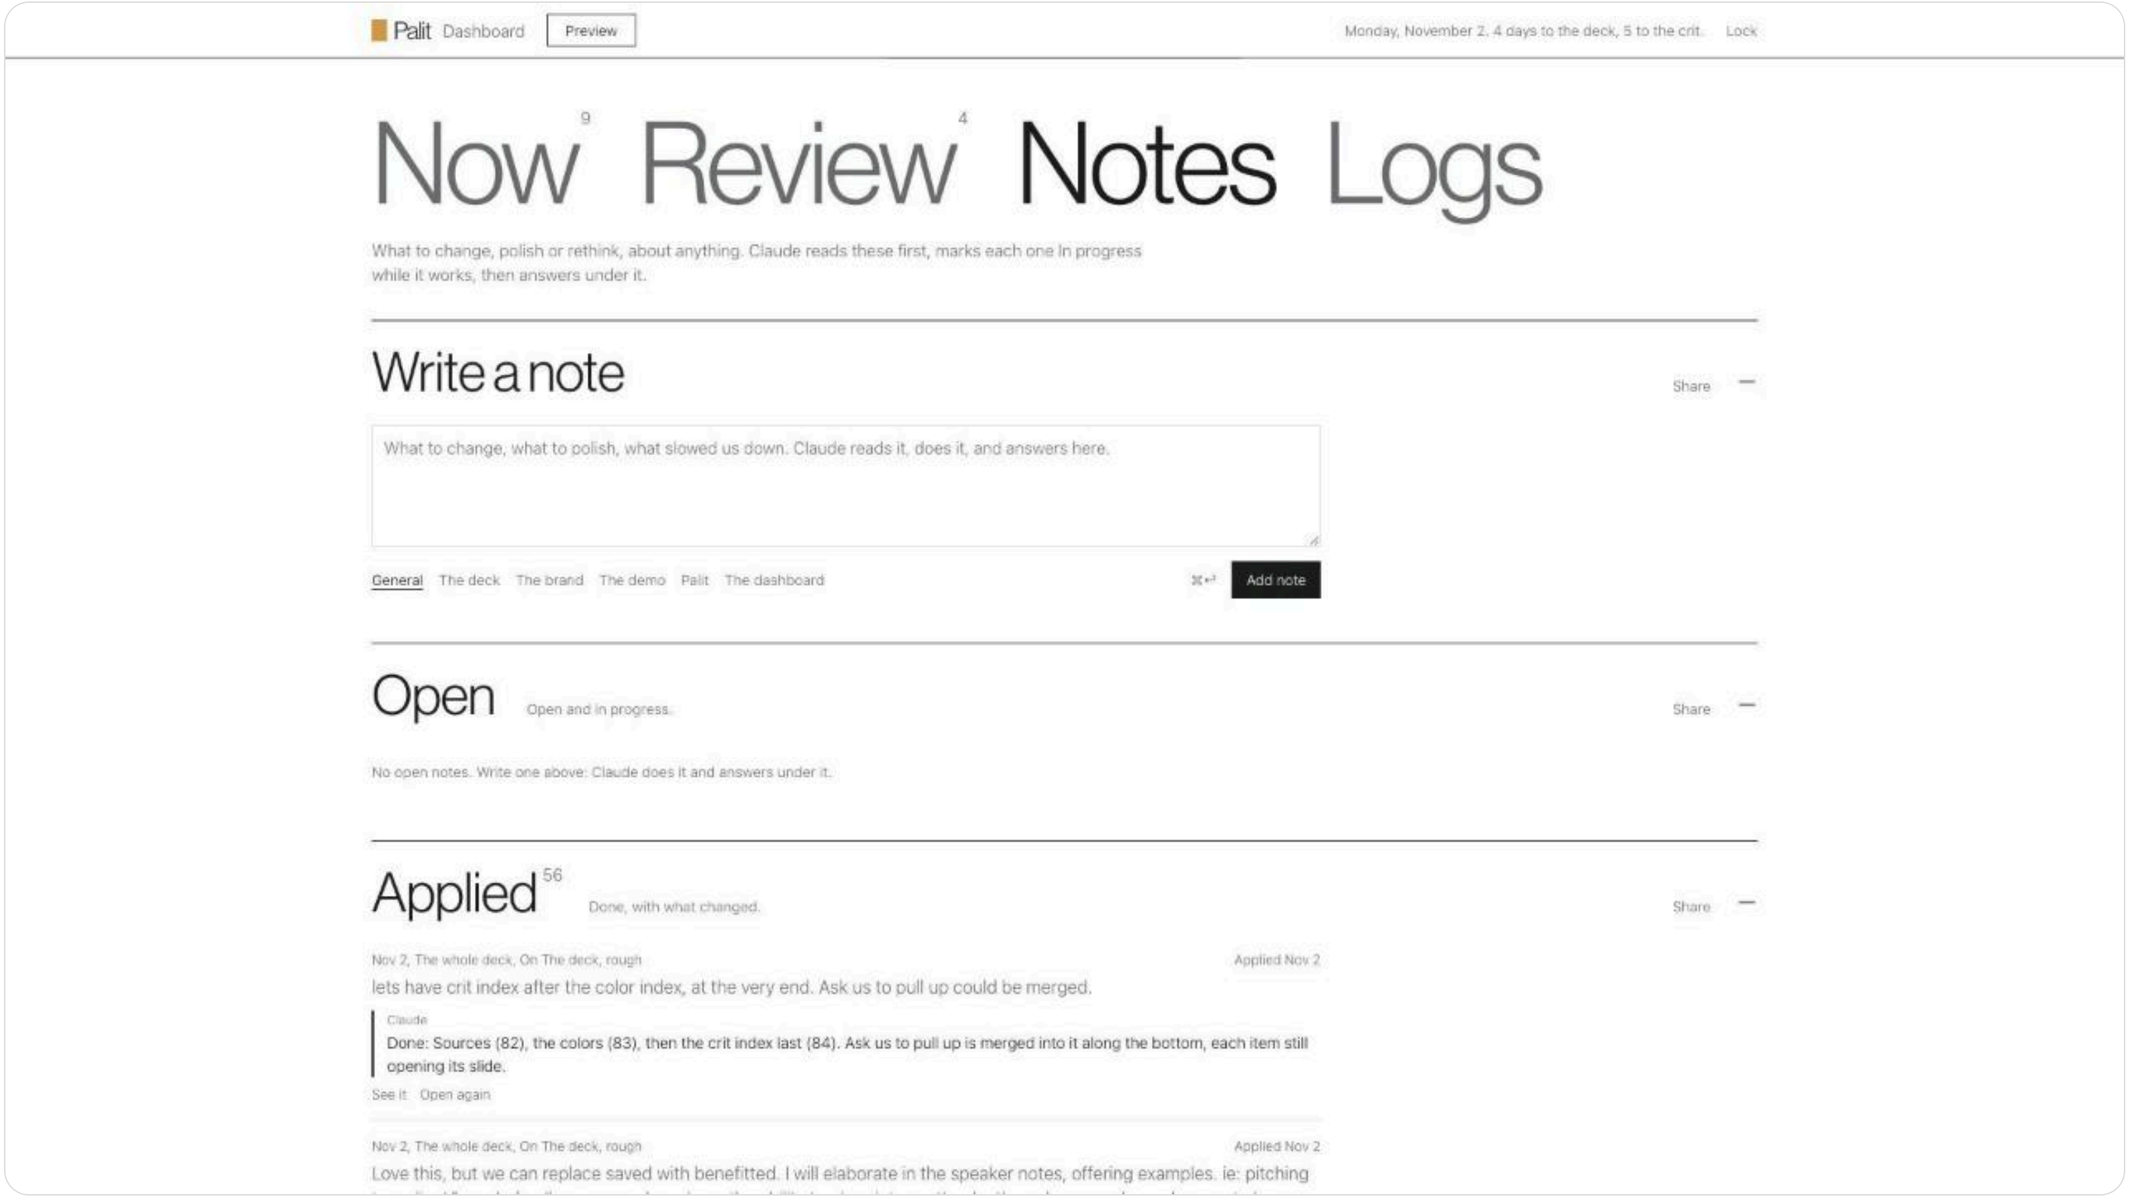

386

decisions logged since the brief, each with its reason.

Oct 31 to Nov 5
Today
The deck and the live demo
The deck: its plan in Logs (entry 318), then the slides, opening on why Palit is a real product
Polish the animations for the live demo, Spectrum included (the wheel stays, entry 315)
The appendix, and the dashboard to Naheel
A portfolio each, live
The landing page, revisited on November 1: simpler (entry 316)
The brand with Daeun: Light and the logo
Friday, Nov 6
The finalist weekend
Morning: share the deck with Naheel for last-minute feedback
2 PM: lunch and workshops with Clay and DoorDash designers
Evening: dinner and an activity
Saturday, Nov 7
The crit, 1 PM at Clay
12:20 PM: arrive and set up
1 to 5 PM: final presentations and crit with industry designers; we may go first or second
The deck, then the live demo, with a laptop to pass around
Sunday, Nov 8
Reflection
Morning reflection session
Wrap up and head home around 1 PM
Every day before today, back to October 16, is in Logs. The weekend's schedule is in docs/15-finals-weekend.md.
To do
Waiting on you, in progress, next, and done lately. Highest priority first.

Your 13 notes of November 2, applied (entry 355): crit points are a red triangle in the corner and the crit index comes last with the pull-up list; Who we are sits like the lockup; Sip's main window and the card up close; a ten-second Albers activity (47); places as a picture or a soft blur (62 to 68, and v3); the closing questions reframed. Do the Albers colors and the blur read the way you meant?

Only waiting on a why
Newest first
Monday, November 2
355 Decision
Thirteen more deck notes: a painted crit corner, the crit index last, Sip in depth, an Albers activity, and places as a picture or a blur
in the rough deck, v3 and Palit app; the four dashboard screenshots (slides 35 to 38) and Palit.app's (slide 70) wait on Noah
354 Decision
The deck's screens go back on white, lifted by the shadow alone
in the rough deck
Updates entry 353
Before
Entry 353 put every slide whose subject is a screen on the shell's gray (#F5F5F5), as Noah's note on slide 47 suggested, with the screen lifted by a soft shadow and its window corners kept round.
After
Every slide is white again, screens included. The shadow and the clean round corners stay, so each screen still stands off the page. The .ground class still marks the slides whose subject is a screen, and the placeholders are empty white windows held by the same shadow.
Why
White, shadow only
Noah, in chat, November 2, asked whether to keep the gray behind the screens or go back to white with only the shadow
341
353
Noah
Day one
A persona
353 Decision
The deck, worked through holistically: crit points as a colored corner, free-standing nodes, and every screen on gray
in the rough deck; slides 34 (the desk) and 63 (Palit app) still wait on screenshots only Noah can take
352 Decision
The survey's headline goes on the deck: 65% couldn't easily say where their last color came from
in the rough deck, as a working figure until the survey closes the night of November 3

Love this, but we can replace saved with benefitted. I will elaborate in the speaker notes, offering examples. ie: pitching

A product one group would love, even if others might hate it, centred on storytelling.

20,516

people pay for Are.na, a place to keep what they find.

Are.na's own figures, October 2026

385,800

Nationally: graphic, web and UI designers work in the US.

So we asked creatives ourselves

76%

of them find color in their own photos.

13 of 17 creatives we asked. Our survey, November 2026

65%

of them couldn't easily say where their last color came from, or why they chose it. That's the story Palit keeps.

11 of 17 creatives we asked. Our survey, November 2026

71%

of them say documenting every color with where they found it would be productive. Palit does it with every pick.

12 of 17 creatives we asked. Our survey, November 2026

What they told us, and what Palit does

76% find color in their own photos	Pick from anything on your screen
65% couldn't trace their last color	Every pick keeps where and when
71% would document every color	Kept in one keystroke, named by you
1 of 17 keep it all in one place	One archive, found again by day

Our survey, 17 creatives, November 2026; Palit.app as it is today

A product one group would love,
even if others might hate it,
centred on storytelling.

Palit is not generative

What users found themselves was almost always more varied than what an algorithm chose.

Over 100 million Spotify listeners. Anderson et al., The Web Conference, 2020

A palette from a prompt is fast.

It's also everyone's palette.

Pantone is consistency.

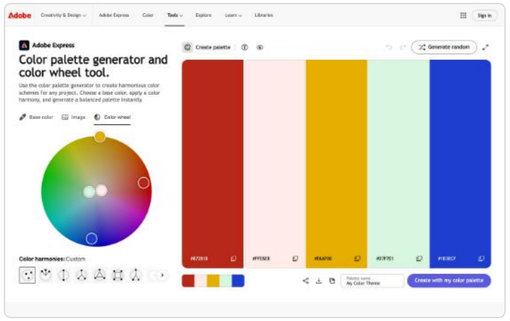

Palit is ownership.

What does Palit do differently?

<10%

of the color pickers we studied keep where a color came from:
1 of 11, and only as a screenshot.

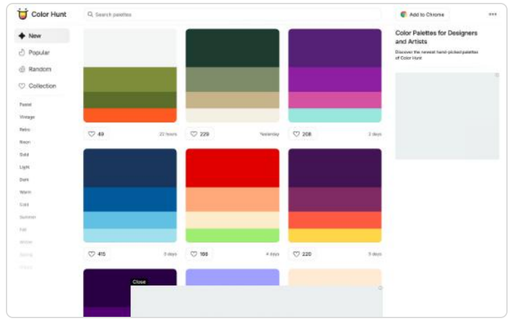

So much around the color
